

Facial Emotion Detection

<https://github.com/aiyshwarya/Facial-Emotion-Detection>

OVERVIEW

Detects facial emotions using machine learning models (CNN, SVM, Decision Tree, Random Forest), data preprocessing, and performance comparison across multiple datasets.

IMPACT

Facial Emotion Recognition (FER) for applications in healthcare, e-learning, retail, surveillance, and more. Training accuracy up to ~99.8%, ICML dataset ~86.1%.

KEY DETAILS

1. Project Overview: Facial Emotion Recognition (FER)
2. Models: CNN, SVM, Random Forest, Decision Tree
3. Datasets: train.csv, test.csv, icml_face_data.csv
4. Performance: Training accuracy up to ~99.8%, ICML dataset ~86.1%
5. Author: Aiyshwarya A, Integrated M.Sc. in Data Science
