

Real Estate Price Prediction

<https://github.com/aivshwary/real-estate-price-prediction>

OVERVIEW

Predicts house prices using supervised regression models. Compares performance using R2 and

IMPACT

Models: Linear Regression, KNN, Decision Tree, Random Forest, AdaBoost, Gradient Boosting. pandas, numpy, matplotlib, seaborn, scikit-learn. Usage: Run notebook with kc_house_data.csv.

KEY DETAILS

1. Models: Linear Regression, KNN, Decision Tree, Random Forest, AdaBoost, Gradient Boosting
2. Requirements: Python 3.9+, pandas, numpy, matplotlib, seaborn, scikit-learn
3. Usage: Run notebook with kc_house_data.csv
